CORNING WARE IS WORTH ALL THE LOVING CARE YOU GIVE IT

The most versatile cooking ware ever developed, **Corning Ware is meant for range-top use.** You can use it to fry, broil, boil, bake and serve. Take directly from freezer to range-top or pre-heated oven. Below are the features that distinguish Corning Ware from other cooking utensils and the reason all good cooks love to cook with it:

- Corning Ware can take hottest range-top heat, but you should reduce cooking temperatures 25°. Heating Corning Ware slowly prevents scorching of food.
- Corning Ware washes spotless in a jiffy because of its smooth, immaculate surface, curved corners. If stubborn stains won't come off with soap and water, rub with sponge and scouring powder. If stains persist, use any good household bleach according to directions. **Do not use metal scouring pads.** They leave grey markings which can be easily washed off. Of course, you can wash Corning Ware in your automatic dish washer (detach handle first).
- Detachable handle fits every piece and locks securely with a single twist. Always remove handle before placing Corning Ware in oven or under broiler.

BEST COFFEE YOU EVER DRANK

One of the real secrets of good coffee is an immaculately clean pot. The Corning Ware Percolator makes wonderful coffee because its surface is not porous and can not absorb flavors or odors.

To make superb coffee every time follow these steps: (1) Measure fresh regular-grind coffee into basket, allowing two level tablespoons per 6 oz. cup of freshly drawn cold water; (2) insert basket assembly into percolator, cover, and percolate slowly 4 to 7 minutes after water boils. For best results, use the full capacity of your percolator (never less than two thirds capacity). Wash percolator thoroughly after each use.

A perfect cup of tea every time in your charming new Corning Ware 6 cup Teapot. Bring freshly drawn cold water to a brisk boil right in the teapot. Take off the range and add tea to the metal brewing device, or use tea bags. Allow 1 rounded teaspoonful tea to every 6 oz. cup of water. Allow to steep 3 to 5 minutes. Remove tea leaves. Then pour the finest cup of tea you ever tasted.

CHERRY TORTE

16 graham crackers
1/3 cup butter

Pat mixture on bottom of skillet firmly. Bring cream cheese to room temperature and beat until smooth with a rotary or electric beater. Beat in 1/2 cup sugar gradually. Add eggs, one at a time, beating hard after each addition. Beat until mixture is very smooth. Pour over crumbs and bake 25 minutes. Remove from oven and cool (if you're in a hurry take Corning Ware Skillet straight from oven to refrigerator). Spoon cherry pie filling (blueberry pie filling is equally delicious) over top and chill in refrigerator 3 hours or overnight. Good looking Corning Ware goes right to the table. Serves 8 more than generously.
